# Weekly Coal Production

Energy Information  
Administration  
Office of Coal, Nuclear,  
Electric, and Alternate Fuels  
**U.S. Department of Energy**

Released for Printing:  
April 23, 1982

## Highlights

Production of bituminous coal and lignite in the week ended April 17, 1982, as estimated by the Energy Information Administration, was 17,560,000 short tons. This was an increase of 758,000 short tons, or 4.5 percent from production in the previous week. Production in the corresponding week of 1981 was 7,941,000 short tons. Bituminous coal and lignite production from January 1 through April 17, 1982 totaled 255,259,000 short tons, up 9.1 percent from production in 1981.

Production of Pennsylvania anthracite in the week ended April 17, 1982, as estimated by the Energy Information Administration, was 130,000 short tons, an increase of 5,000 short tons or 4.0 percent from production in the previous week. Production in the corresponding week of 1981 was 120,000 short tons. Anthracite production from January 1 through April 17, 1982 totaled 1,898,000 short tons, up 10.5 percent from production in 1981.

*Weekly Coal Production* provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports and exports, and related supply and demand data are provided as they become available.

*Weekly Coal Production* is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

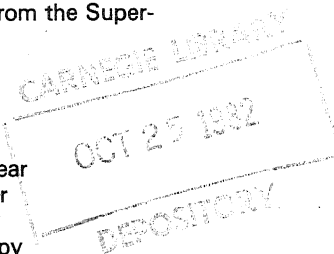

This publication is available on an annual subscription basis from the Superintendent of Documents, U.S. Government Printing Office.
